

## The Annual Quality Assurance Report (AQAR) of the IQAC

All NAAC accredited institutions will submit an annual self-reviewed progress report to NAAC, through its IQAC. The report is to detail the tangible results achieved in key areas, specifically identified by the institutional IQAC at the beginning of the academic year. The AQAR will detail the results of the perspective plan worked out by the IQAC. (Note: The AQAR period would be the Academic Year. For example, July 1, 2012 to June 30, 2013)

## **Annexure (ii)**

### **Best Practices- No. 1**

#### **1. Title of the Practice**

Organizing conferences/seminars/talks regularly by involving faculty and students.

#### **2. Objectives of the Practice**

The conferences/seminars/talks are organized to fulfill following objectives:

- (i) To provide the latest information regarding various issues and problems faced by the society and their possible remedies.
- (ii) To provide a platform for the faculty and students to interact with the experts and eminent personalities of different fields.
- (iii) To provide the faculty and students in hand training of holding an event.

#### **3. The Context**

The seminars and talks provide us a platform for the interaction with the experts of a particular field. This interaction paves way for new thoughts and research thereof. Students are made aware of different burning issues and sensitized for putting their view and developing new ideas. These discussions also help us to know about the latest research done in that particular field, so one can plan a study and do research as Ph. D. scholar or send a proposal for minor and major projects thereafter. Organizing seminars/conferences/talks also provide the stakeholders, faculty and students, an in hand opportunity and practice of managing or holding an event.

#### **4. The Practice**

To organize conferences/seminars/talks is not a regular practice in most of the institutes in India, especially in institutes which are situated in far flung areas or rural areas. This college of Jammu and Kashmir is doing excellent job in organizing conferences/seminars/talks of National level on regular basis. In these seminars we take up important issues like global warming, climate change, higher education etc. Such events of national level enable us to bring experts of these fields to this semi-urban area and provide exposure to the faculty and students of the college. The data and research shared by the experts helps the stakeholders to improve their knowledge and plan future research.

The main constrain and limitation of holding such events is the non-availability of a good number of quality experts.

#### **5. Evidence of Success**

Govt. Degree College is basically an Under Graduate (UG) institute with only one Post Graduate (PG) course in Geography. But a good number of students opting for PG in various Universities of India and also pursuing research in different subjects (exact data not available) are signs of success in sensitizing these students by organizing such events (conferences/seminars/talks). A good number of faculty members going for Ph. D. is another positive sign in this respect.

Other than these evidences, the overwhelming participation of the students in various social issues like swachh bharat abhiyan, polythene eradication drives, fight against open defecation etc. also proves that they are enlightened and motivated by organizing these events.

#### **6. Problems Encountered and Resources Required**

The main problem of holding such events in this college is non-availability of a good number of quality experts and participants. As the college is situated about 90 Km from the nearest airport, generally the organizers face some problems on account of non-acceptance by the desired resource person and participants.

## **Best Practices- No. 2**

### **1. Title of the Practice**

Organizing picnics, subject tours and educational tours on annual basis.

### **2. Objectives of the Practice**

The outdoor activities are carried out with following objectives:

- (i) To provide the practical knowledge about the local and national areas.
- (ii) To improve the cultural knowledge of the state in particular and nation as a whole.
- (iii) To impart the holistic knowledge about a particular subject topic.

### **3. The Context**

There are a number of things and concepts which we learn and understand through practical knowledge. Moreover, the things taught in the classroom are generally implemented or practiced in the outdoor world. So the events like picnic, subject tours and educational tours provide an opportunity to understand various concepts which we learn in the classroom. In addition to this, these events provide a chance to the students and members of the faculty to interact with each other and have a discussion about any issue like banning of polythene, encroachment, hygiene, developmental activities, conservation of natural resources, impact of climate change etc. related with that spot or area or the nation. Educational tour is generally an event of about 15 days in which the students visit several important historical places of the country. Students learn numerous things about the various cultural practices of states they visit, ancient architectures they see and development they observe.

### **4. The Practice**

Picnics are part of almost every higher education institute of India. The visit of local and nearby areas helps us to know about the local diversity and observe the changes taking place with time and development. Subject and education tours are something which is not a common event for most of the colleges and this makes our institute special. Regular subject and educational tours provide the students overall information about the various topics discussed during the trip. The students know about the local vegetation, seasonal flowers, rocks, minerals, rivers, seasonal streams, industries, industrial pollution etc. These visits enhance their understanding about the topic and impart a life-long experience of the student. These tours also provide a platform for interaction between students and teachers, and the locals and workers of the area they visit.

### **5. Evidence of Success**

The exposure which students get after attending picnics, subject tours and educational tours help the student in their holistic development. These events impart the practical knowledge and strengthen their understanding about the classroom teaching. The impacts of organizing these events are evident in the form of very good academic results of the college, good participation in social activities like awareness campaigns, swachh bharat abhiyan, yoga day celebrations etc.

### **6. Problems Encountered and Resources Required**

Picnic and subject tours are organized with the nominal fee submitted by the student and local funds available with the institutes. But, for educational tours students have to pay heavily which deprives a number of poor students from attending these events.
